

Cyber Security MCQ Test (Questions 1–50)

1. Which of the following is an example of a vulnerability?

- A) Firewall
- B) Encryption
- C) Outdated Software
- D) Antivirus

2. Which browser feature does not save browsing history after the session ends?

- A) Incognito Mode
- B) Bookmark Manager
- C) Download Manager
- D) Reading List

3. Which password is the strongest?

- A) Rahul123
- B) K#8m!P2@Lx9Q
- C) Password123
- D) Welcome1

4. Which of the following is NOT a part of the CIA Triad?

- A) Availability
- B) Confidentiality
- C) Integrity
- D) Authentication

5. Which malware spreads automatically without requiring user action?

- A) Spyware
- B) Worm
- C) Trojan Horse
- D) Virus

6. Which software is primarily used to detect and remove malware?

- A) Calculator
- B) Paint
- C) WordPad
- D) Antivirus

7. What is the main purpose of a phishing attack?

- A) Increase Internet Speed
- B) Compress Files
- C) Improve Browser Performance
- D) Steal Sensitive Information

8. Which of the following is proprietary software?

- A) Ubuntu
- B) LibreOffice
- C) Microsoft Windows
- D) Linux

9. Which feature provides an additional layer of security while logging in?

- A) Password Reuse
- B) Weak Password
- C) Sharing Credentials
- D) Two-Factor Authentication (2FA)

10. The padlock icon displayed in a web browser indicates:

- A) The website is government approved
- B) The website is virus-free
- C) The connection is encrypted (HTTPS)
- D) The website is popular

11. What does 2FA stand for?

- A) Two Firewall Access
- B) Two-Factor Authentication
- C) Two File Access
- D) Two Folder Authentication

12. Which tool is used to securely store multiple passwords?

- A) Password Manager
- B) Calculator
- C) Paint
- D) Notepad

13. Which of the following best defines cyber risk?

- A) Impact $\times$ Backup
- B) Threat + Firewall
- C) Threat $\times$ Vulnerability $\times$ Impact
- D) Vulnerability $\div$ Threat

14. Which of the following is considered good netiquette?

- A) Sending spam emails
- B) Using offensive language
- C) Typing in ALL CAPS
- D) Respecting others' privacy

15. Which malware secretly collects user information without permission?

- A) Worm
- B) Virus
- C) Trojan Horse
- D) Spyware

16. A secure website usually starts with:

- A) ftp://
- B) file://
- C) https://
- D) http://

17. Which device or software filters incoming and outgoing network traffic?

- A) Cookies
- B) Malware

- C) Browser
- D) Firewall

18. What should you do if you receive a suspicious banking email?

- A) Reply with your password
- B) Click the attachment immediately
- C) Visit the bank's official website directly
- D) Forward it to your friends

19. Which type of software allows users to view and modify its source code?

- A) Proprietary Software
- B) Trial Software
- C) Commercial Software
- D) Open Source Software

20. Which malware appears to be genuine software but actually contains malicious code?

- A) Virus
- B) Trojan Horse
- C) Spyware
- D) Worm

21. Which principle of the CIA Triad ensures that information is available whenever authorized users need it?

- A) Authentication
- B) Confidentiality
- C) Integrity
- D) Availability

22. Which of the following is an example of authentication?

- A) Firewall
- B) Password Login
- C) Backup
- D) Antivirus

23. Which type of software is free to use but generally cannot be modified by users?

- A) Proprietary Software
- B) Trial Software
- C) Open Source Software
- D) Freeware

24. Which browser feature does not save browsing history after the session ends?

- A) Reading Mode
- B) Download Manager
- C) Bookmark Manager
- D) Incognito Mode

25. Before clicking a link in an email, what should you do?

- A) Hover over the link to verify the URL
- B) Disable antivirus
- C) Reply to the sender
- D) Download the attachment

26. Software piracy means:

- A) Using licensed software legally
- B) Updating software regularly
- C) Illegal copying or distribution of software
- D) Installing antivirus

27. Which of the following is NOT a cybercrime?

- A) Hacking
- B) Identity Theft
- C) Phishing
- D) Using Genuine Licensed Software

28. Which malware attaches itself to files and spreads when the infected file is executed?

- A) Worm
- B) Virus

- C) Spyware
- D) Trojan Horse

29. Which principle of the CIA Triad protects information from unauthorized access?

- A) Confidentiality
- B) Availability
- C) Authentication
- D) Integrity

30. Which of the following is the weakest password?

- A) H!8vQ@2Lm#
- B) Password123
- C) X7\$pL9@rQ
- D) M@x92#TyLp

31. Which section of the Information Technology Act, 2000 deals with hacking?

- A) Section 67
- B) Section 43
- C) Section 66
- D) Section 66A

32. Which cyber attack uses fake emails or websites to steal personal information?

- A) Virus
- B) Encryption
- C) Firewall
- D) Phishing

33. Which security technique converts readable information into unreadable form?

- A) Firewall
- B) Antivirus
- C) Compression
- D) Encryption

34. Which of the following is the best cyber security practice?

- A) Using strong and unique passwords
- B) Sharing passwords with friends
- C) Disabling antivirus software
- D) Downloading cracked software

35. Which type of attack tricks users into believing they are interacting with a trusted organization?

- A) Worm
- B) Trojan Horse
- C) Spyware
- D) Phishing

36. Which of the following is an example of open-source software?

- A) Microsoft Office
- B) LibreOffice
- C) Adobe Photoshop
- D) Microsoft Windows

37. What is the recommended password length for better security?

- A) 6–8 characters
- B) 12–16 characters
- C) 4–6 characters
- D) 8–10 characters

38. Which of the following helps reduce malware infections?

- A) Ignoring browser warnings
- B) Downloading software from unknown websites
- C) Keeping antivirus software updated
- D) Disabling Windows Update

39. Which section of the IT Act deals with publishing obscene material electronically?

- A) Section 66
- B) Section 43
- C) Section 66A
- D) Section 67

40. Cookies are mainly used to:

- A) Remove viruses
- B) Encrypt files
- C) Increase internet speed
- D) Store browsing information

41. Which of the following is a preventive security control?

- A) Firewall
- B) Spyware
- C) Virus
- D) Trojan Horse

42. Which principle of the CIA Triad ensures that data remains accurate and unchanged?

- A) Authentication
- B) Confidentiality
- C) Integrity
- D) Availability

43. Which of the following is considered a cyber threat?

- A) Backup
- B) Strong Password
- C) Hacker
- D) Firewall

44. Which statement about Incognito Mode is correct?

- A) It encrypts all internet traffic.
- B) It doesn't save local browsing history after the session ends.
- C) It prevents all cyber attacks.
- D) It hides your IP address from every website.

45. Which law is India's primary legislation for cybercrime?

- A) Companies Act
- B) Consumer Protection Act
- C) Copyright Act
- D) Information Technology Act, 2000

46. Which malware is commonly used to record keystrokes and steal passwords?

- A) Virus
- B) Firewall
- C) Worm
- D) Spyware

47. Which symbol in a browser indicates a secure HTTPS connection?

- A) Home Icon
- B) Padlock Icon
- C) Globe Icon
- D) Star Icon

48. Which of the following should be avoided while creating a password?

- A) Using uppercase and lowercase letters
- B) Using numbers and symbols
- C) Using your name or common words
- D) Using special characters

49. Which of the following best describes a vulnerability?

- A) A weakness that can be exploited by an attacker
- B) Antivirus software
- C) A security policy
- D) A backup file

50. Which combination correctly represents the CIA Triad?

- A) Authentication, Backup, Encryption
- B) Integrity, Antivirus, Access
- C) Confidentiality, Internet, Authentication
- D) Confidentiality, Integrity, Availability
